

Safera Airis stove guard

The easiest way to improve kitchen safety

Safera Airis stove guard is a secure and effective way of improving kitchen safety. It combines discreet additional safety with ease of use.

SAFERA[®]

We sense what humans don't

Benefits of Safera stove guard

Unattended and careless use of the cooker is the main cause of home fires. Safera Airis stove guard prevents cooking fires by sounding an alarm – if needed – disconnecting the power from the cooker well before the fire occurs.

1 Easy and relaxed living

No more worrying about what you've left on the stove, kids and pets in the kitchen or what to do if a fat fire starts

2 Safer and more independent living

The whole family can cook just, like before, only safer than ever, even if members of the family have memory problems or life gets a little hectic.

3 Protect your property

A fire can take everything. Protect your property against fire and water damage with one solution.

Why to choose Safera stove guard?

- Wireless convenience
- Intelligence for quick and easy installation
- Discreet design
- Standard EN 50615 compliant
- Award-winning solution

A woman with blonde hair, wearing a white long-sleeved shirt and a red apron with a green patterned border, is smiling as she cooks. She is holding a bundle of uncooked spaghetti over a black pot on a stove. The kitchen has a modern stainless steel range hood with a circular light fixture above the stove. The background is bright and slightly blurred, showing a white wall and a blue vase on a shelf.

Preventing the #1 cause of household fires

Recommended by

Fire authorities

"Cooking is the #1 cause of home fires and they cause a lot of extra work for fire service. With Safera stove guard, cooking fires can be reduced very efficiently. It should be installed in every kitchen".

Insurance companies

"We have tested a lot of stove guards on the market, and we chose Safera to be recommended to our customers. We also use Safera in all of our own rental houses to protect our long-term investments."

TRYGG HANSA

Gjensidige

Home care providers

"With Safera stove guard elderly people are able to use the cooker safely which reduces work for caretakers. Safera is automatic and gives no false alarms. The remote alarm is also very handy."

Electricians

"Fastest installation on the market and unbeatable quality with great price. Safera stove guards meet the EN 50615 standard and all electrical requirements, so I feel confident installing them."

Power control units

3-phase, fixed installation

Model: PCU6.3-F
Connection: 3 x 16 A max. 400 V
IN: Screw terminals on PCB
OUT: Screw terminals on PCB

1-phase, fixed installation

Model: PCU6.1-F
Connection: 1 x 32 A 230 V
IN: Screw terminals on PCB
OUT: Screw terminals on PCB

1-phase, plug for stoves

Model: PCU6.1-P
Connection: 1 x 25 A 230 V
IN: Screw terminals on PCB
OUT: 1-phase plug for stoves

3-phase, Perilex-plug

Model: PCU6.3-P
Connection: 3 x 16 A max. 400 V
IN: Perilex-plug
OUT: Perilex-plug

Accessory: Water leakage sensor

Prevents damages caused by water leaks by sounding an alarm if a leak is detected. One stove guard can accommodate up to four detectors, which can be placed under most typical leakage points such as the sink or dishwasher.
